

10 10 = 20

10 10 = 20

10 10 = 20

Activity 1: A box divided into two halves by a vertical line. The left half contains two vertical columns of five circles each, with two additional circles placed between them in the middle row. The right half contains two vertical columns of five circles each, with two additional circles placed between them in the second row from the top.

Activity 2: A box divided into two halves by a vertical line. The left half contains two vertical columns of five circles each, with two additional circles placed between them in the middle row. The right half contains two vertical columns of five circles each, with no additional circles.

Activity 3: A box divided into two halves by a vertical line. The left half contains a grid of circles: a top row of three circles, and four rows of four circles each. The right half contains two vertical columns of five circles each, with two additional circles placed to the right of the second column in the second and third rows from the top.
